Lock frame

### Step 2

Arrange frames as seen in Diagram A.

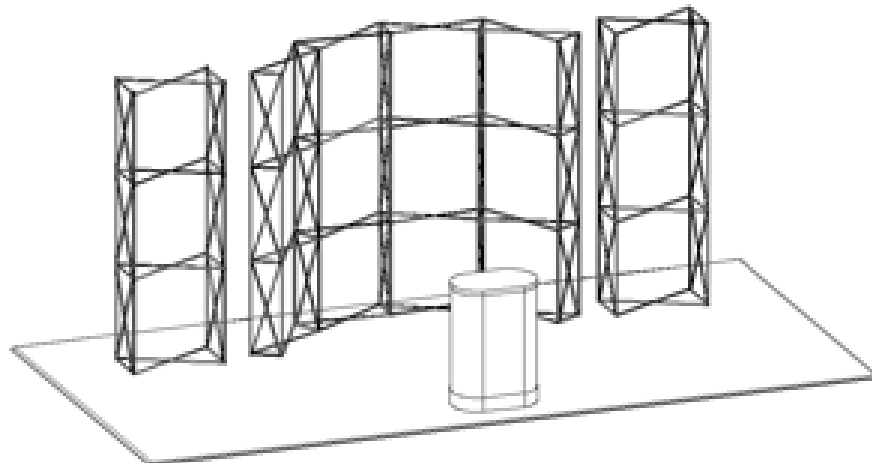

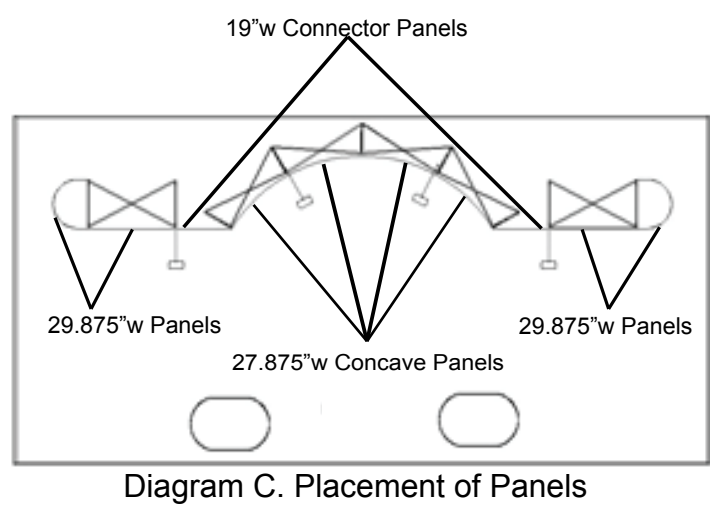

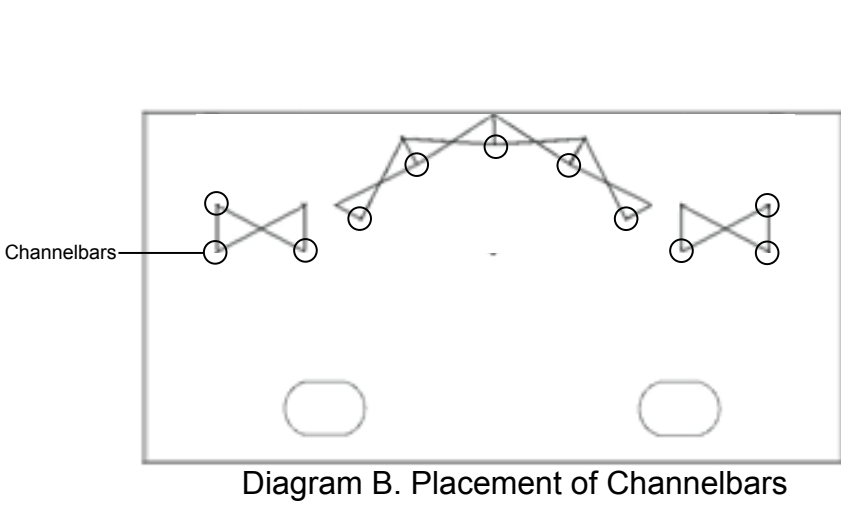

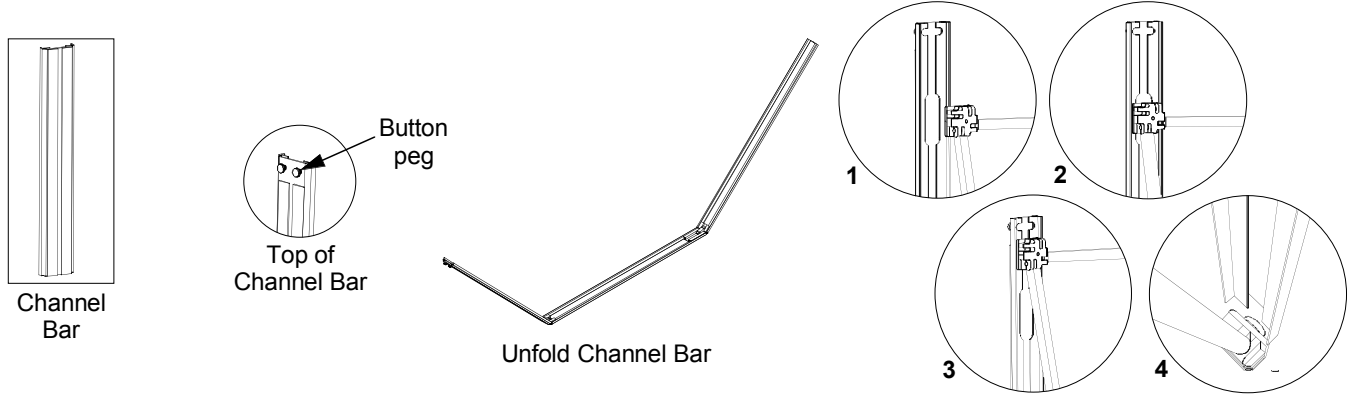

Diagram A. Placement of Frames

**Step 3**

Remove Channel bars - unfold Channel bars and slide over hubs marked on diagram B. Start at top hub and slide down making sure that Channel bar is secure on each hub.

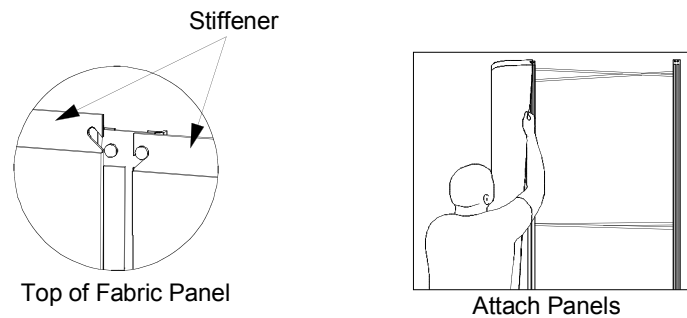

Remove Channel bars - unfold Channel bars and slide over hubs on **back corner of frame** for end panels. Start at top hub and slide down making sure that Channel bar is secure on each hub.

**Step 4**

See Diagram C for fabric panel sizes and location.

Remove Fabric panels - Locate top of Fabric panels, it will have a notched out stiffener to hang on "button pegs" on Channel bar, hang and roll Fabric panel onto Channel bar being careful to align each to center point of Channel bars.

**Step 5**

Remove Halogen lights - Slide flange on base of light into top slot on Channel bar, adjust lighting direction.
