

Note: Assembly is the same for all Mobi banner stands.

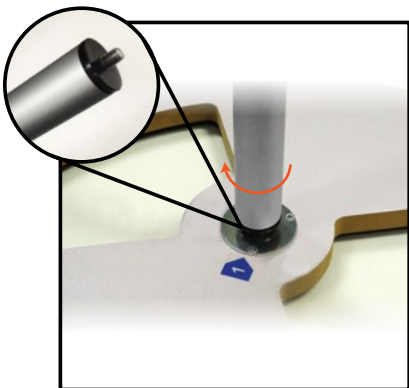

1. Pull graphic through the bottom of the base plate.

2. Starting with the long ends of the base, tuck the silicone-edged graphic into the channel.

3. Using the push-button connectors, assemble the center and top poles.

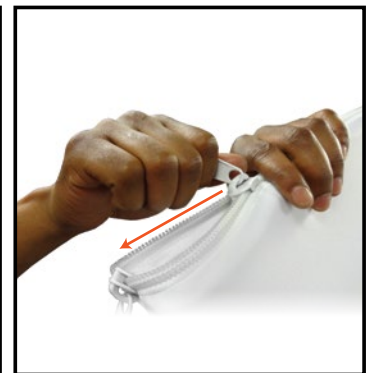

4. Screw the center pole into the internal thread of the base plate. Do not overtighten.

5. Slide the top pole into the center support pole.

6. Pull the graphic up to the top of the frame.

7. Use the zippers on top to complete the graphic installation.

8. To install the optional lights, place the lighting clip into the top hole of the frame.

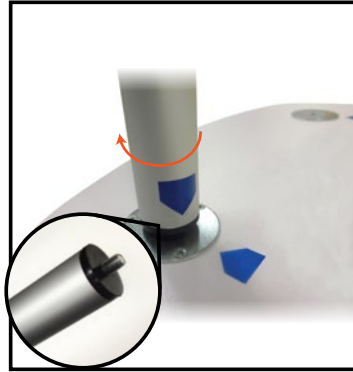

9. Mount the lights into the light clip and zip the graphic.

1. Place the countertop on the ground so the female connection points are facing upward.

2. Using the corresponding numbers, hand-tighten the vertical support poles into the countertop.

3. Slide the remaining four vertical support poles into the poles mounted to the countertop.

4. Place the counter base on top of the support poles. While holding the bottom pole, hand-tighten the top pole into the base.

5. Pull the graphic over the counter, making sure the back seam of the graphic is centered on the T-channel.

6. Fold and tuck the silicone edge into the channel. Flip counter and repeat.
